How it works

Open the box and plug in your brand-new appliance.

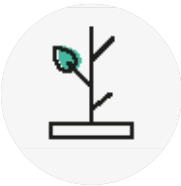

Download the Homefarm app to stay connected throughout your journey.

Simply follow the on-screen instructions on your unit to set up your Homefarm.

Open a Soil Pack, empty into a Homefarm Planter Tray, on Soil and insert into the unit.

That's it. Your seeds will begin sprouting within days. Keep an eye on your crops and watch them grow.

Harvest your crops within weeks to begin enjoying them in your favourite meals every day.

Yield up to 1kg of crops per month.

Modular and flexible

Homefarm can be installed on a countertop or be built into cabinetry above or below a countertop.

Homefarm is easy to install and can be done by anyone, just follow the user manual, included with the product.

Appliance Dimensions

Length: 598mm X Width: 484mm X Height: 422mm

The Appliance

A closed grow environment with ventilation and humidity control protects the crops from pests, dust, and other airborne contaminants.

Programmable and Automated Lighting and watering cycles allow for maximum ease and convenience.

A premium touch screen interfaces with temp, humidity, and water level feedback.
