

Always fresh, Always Available, Grown on site

The Home farm Commercial System

Homefarm is an indoor farming technology and equipment provider.

We are a proudly South African, Level 4 BBBEE business, founded in 2017.

Our indoor farms can grow a wide variety of microgreens, herbs, and lettuces. Our largest system (seen above) can grow up to 9kgs of produce per month.

Homefarm offers a turnkey, Farming As A Service (FAAS) model, taking much of the work out of the farm, so that you can focus on marketing, using or selling your produce.

Farming as a Service

Delivery of Consumables X2 per week

Online Crop Planning Platform

Maintenance and Servicing

Remote Monitoring

Optional Harvesting and Packaging Services

All you need to become an indoor farmer with one of our systems:

- An Indoor Site
- An Electrical Mains outlet
- A Water Mains outlet
- A Wi-Fi Connection

The Homefarm team works with you to plan your harvests and maximise the success of growing and selling your own produce.

Benefits of Indoor Farming Systems

Year-round harvests

Higher Yields

Organic Produce

Protected from Pests and bad Weather

Smart and Automated

Minimal Effort and Easy to Use

Our range of crops includes favourites like:

Leafy Greens such as Cos Lettuce, Pak-Choi and Kale

Microgreens such as Brocolli, Swiss Chard and Sunflower

Herbs such as Basil, Parsley and Coriander

See the full list on our website: www.myhomefarm.io/crops

Our crops are grown on standard 10x20 inch trays with special grow mix containing beneficial microbes and slow release nutrients.

Guaranteed, tried and tested seeds and varieties are available for a wide range of fresh produce.

- Automatic watering
- Automatic sump refill (access to water mains required)
